EXPERIENCE

BeanKeeper – Capstone Project | Front-end Developer

January 2023 ~ June 2023 | Seattle, WA

- Led a 4-member development team to successfully implement 6 distinct front-end pages for the web application product "BeanKeeper."
- Designed and crafted reusable React components that significantly expedited development cycles for fellow team members
- Collaborated with cross-functional developers to assess and select an optimal software architecture for a comprehensive full-stack application and spearheaded the creation of a 6-month technical product feature roadmap
- Worked closely with a Product Manager to integrate tasks into an agile methodology.
- Website currently running at: <https://capstone-77b48.web.app/>
- Technology stacks used: React.js, HTML, CSS, Node.js, Azure Authentication, MongoDB, GitHub & Google Firebase

UW GRANT & CONTRACT ACCOUNTING | Accounting Intern

February 2020 ~ August 2022 | Seattle, WA

- Assisted in processing transactions to ensure compliance with the University, NIH, and SOX regulations
- Reconciled accounts receivable system balance with general ledger through Excel, Sage and MyFD network
- Reconciled 2000 contract budgets on F&A costs, and invoices for University corporate sponsors

PwC | Transfer Pricing Intern

June ~ August 2021 | Seattle, WA

- Built IP valuation model based on client's financial data and provided benchmarking analysis on 12 companies for Devices and Service (D&S) products
- Oversaw the company's transfer pricing matters and partnering with multiple stakeholders to provide support on transfer pricing related issues
- Assisted in preparing transfer pricing documentation to support intra-group transactions in compliance with local regulations

RHO INNOVATE | Technical Project Lead

March 2020 ~ June 2021 | Seattle, WA

- Led & managed the website development process, strategically selecting and integrating tools for optimal website deployment.
- Reviewed CSS, HTML, and JavaScript code for semantic correctness and UI functionality
- Employed a Kanban methodology using Trello boards to assign tasks among team members
- Managed communication across 4 sub-committees and 6 members, overseeing market research, finance, supply chain, and website development.
- Website currently running at: <https://flareandflora.netlify.app/>
- Technology Stacks used: HTML, CSS, JavaScript, GitHub & Netlify

RHO INNOVATE | Front-End Developer

June 2019 ~ March 2020 | Seattle, WA

- Modified and implemented custom features from the HTML, CSS, and JavaScript template to enhance the website's suitability.
- Utilized Netlify to deploy the Petrichor company website, bolstering online visibility.
- Conducted market research on potential products related to sustainability and conducted in-depth research on aromatherapy bracelets.
- Website currently running at: <https://petrichor-rho.netlify.app/>
- Technology Stacks used: HTML, CSS, JavaScript, GitHub & Netlify
